

REQUEST FOR PUBLIC COMMENTS

The Angelina County Sheriff's Office is seeking comments from the public regarding a proposed radio communications tower to be erected on property owned by the Central Independent School District located just off US Hwy 69 near O'Quinn Road. This project will be funded by monies allocated to Angelina County under the US Forest Service's Secure Rural Schools Program. Expenditures under this federal program are limited to projects and items specifically allowed under the rules promulgated by the U.S. Forest Service.

This communications tower is needed to provide emergency and radio dispatch services where signals from current county towers will not reach. Central ISD police officers have no radio contact inside the school buildings with outside agencies or dispatchers. Central Volunteer Fire Department members have spotty communications in the dead areas for radio coverage in the far west and northwest areas of their service area. The addition of this tower to the county communications network will help provide better communications for law enforcement, fire and EMS in these areas of the county.

Interested parties may submit comments to: comments@angelinacounty.net electronically or via US Mail to the Angelina Co Sheriff's Office at P.O. Box 114, Lufkin, Texas 75902-0114. Comments must be received prior to June 30, 2025.
